

## EMBRYO DONATION CYCLE

### • Initial consultation in Alicante & basic tests €200

Includes: patient's serology of infections (HIV, Hepatitis B, Hepatitis C & Syphilis); blood group, female ultrasound scan, trial embryo transfer test

### Not included

Tests and recipient medication

### **Euploid Embryo(s)**

An euploid blastocyst is an embryo with the correct number of chromosomes (tested by PGS via NGS technology) that is, a chromosomally normal embryo, and therefore, transferable. Treatment with 1 euploid embryo is **€3,450** or Treatment with 2 euploid embryos is **€4,800**.

## Donor selection matching

### How we select & match donors

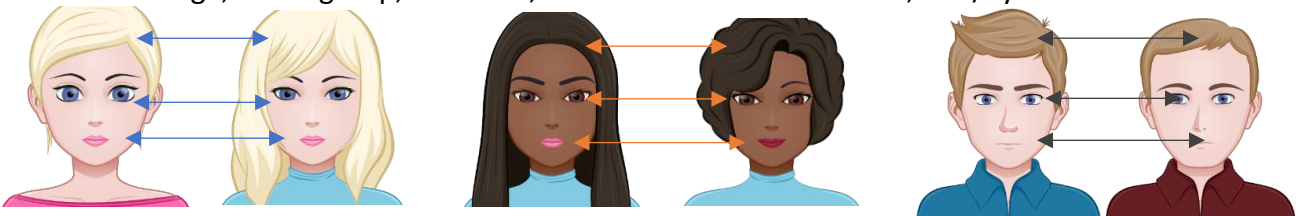

Dr consultation and psychological tests performed  
Family tree (three generations) to discard the most common hereditary illnesses  
Genetic screening (Karyotype) plus genetic panel  
Blood serological tests for infectious diseases  
Extensive female tests

### SPECIFIC AND SPECIALISED DONOR MATCHING TEAM

### Pool of more than 500 donors

Our aim is to search for the most similar characteristics (matched physical details & patient's pictures)  
The donor details that we provide are:

Age, blood group, skin tone, confirmation of normal BMI, hair/eye colour

### ALL DONATIONS WILL BE ANONYMOUS

As per Spanish Law, donations are anonymous and no bidirectional contact is permitted

### UR Vistahermosa donor DNA Banking

No cost for the patient and lifelong storage of the donor's blood

### GENETIC MATCHING available

Basic genetic panel for autosomal recessive diseases (15 genes)  
Extended genetic panel for autosomal recessive diseases (552 genes)

**IMPORTANT:** We take the care of our egg & sperm donors very seriously. During stimulation we monitor daily or every other day to avoid any risks. In order to give the best options for our patients, we give the best care to our donors. Uniquely, on the night of the egg collection, the donor sleeps in the hospital to guarantee that they feel fine and they go home the next morning.
