

EGG DONATION CYCLE + PGT-A

Initial consultation + basic tests 350€

Includes: both patient's serology of infections (HIV, Hepatitis B and C and Syphilis) and blood group, female ultrasound scan and transfer test and basic sperm test and male karyotype

Not included

Tests and medication
Embryo freezing and 1 year of storage 920€
FET 800€

OPTIONAL ADDITIONAL TECHNIQUES

Time-lapse 350€

It is the most modern and innovative human **embryos incubation system** that is revolutionizing the global reproductive biomedicine. It reproduces the natural into an ideal growing environment. It incorporates a recording system that allows you to view, monitor and analyze at any time the embryo development without altering the conditions of in vitro culture.

EmbryoScope™ Geri

MACS 325€

It is a **Sperm Selection Technique** that allows us to choose those sperm with better characteristics to be used in the Assisted Reproduction Techniques improving the possibilities of achieving pregnancy.

ERA test 800€

(Endometrial Receptivity Array) is a molecular diagnostic **test** to investigate the receptivity of endometrium. Receptivity of the endometrium is a condition in **which** the endometrium (uterine lining) is ready for implantation (nesting) of the embryo.

GENETIC TESTINGS

PGT-M Preimplantation genetic testing for Monogenic disease

PGT-SR Preimplantation genetic testing for Structural Rearrangement

PGT-A Preimplantation genetic testing for Aneuploidies

Pre-conceptual genetic carrier testing (genetic matching)

Genetic matching (see Donor selection matching page)

Sperm donor

Our aim is to search for the most similar to the patient (matched with physical details and pictures of the patients)

Donor selection matching

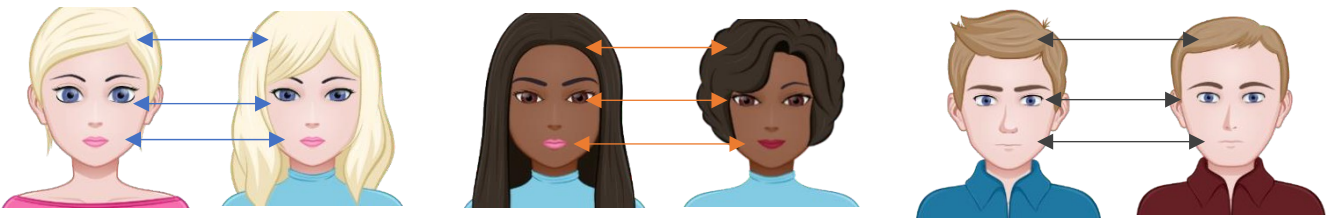

How we select and match your donors

1st consultation and psychological test
Family tree (three generations) to discard the most common hereditary illnesses.
Genetic screening (Karyotype) and genetic panel Blood serological tests for infectious diseases Extensive female tests

SPECIFIC AND SPECIALIZED TEAM FOR THE SELECTION OF THE DONORS

Pool of more than 500 donors

Our aim is to search for the most similar to the patient (matched with physical details and pictures of the patients)

ALL DONATIONS WILL BE ANONYMOUS AND BIDIRECTIONAL

The donor will never be able to contact you or your baby and you will not be able to contact the donor

Pregen counts with donor DNA Banking

No cost for the patient and lifelong

GENETIC MATCHING available

Basic genetic panel for autosomal recessive diseases (15 genes)
Extended genetic panel for autosomal recessive diseases (552 genes)

IMPORTANT: our donors are persons we have to take very well care of. We monitor her daily or every other day to avoid any risks for them. In order to give the best options for our patients, we give the best care to our donors.
